

**TOSHIBA**

**AIR CONDITIONING**

# ***SMMSu***

*SUPER MODULAR MULTI SYSTEM*

**The ultimate VRF system**

*Better Air Solutions*

# TOSHIBA SOLUTIONS

---

Toshiba was the first company to incorporate inverter technology into air conditioning systems in 1981 and since then, it has maintained the technological advancements over the course of time.

The development of the exclusive Triple Rotary Compressor system has re-affirmed the ability to innovate and maintain technological leadership in a very crowded market. For Toshiba, innovation also means a strong commitment to international institutions that carefully evaluate the impact of new technologies on our environment.

Toshiba combines technological development with care for future generations - the result is a range of energy-efficient air conditioners that contribute to reducing greenhouse gas emissions.

# TOSHIBA HISTORY

---

Toshiba produced its first air conditioning units in the 1950s, and immediately worked on introducing improvements. Its role as an innovator continued with the introduction of the rotary compressor and electric controls.

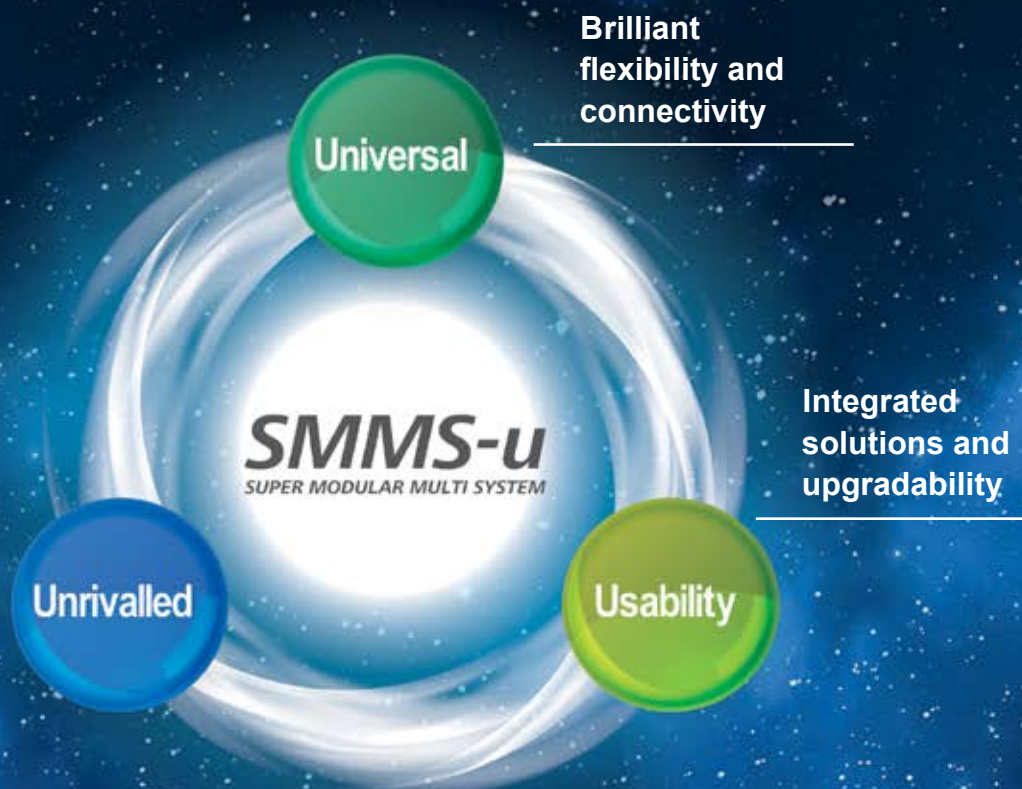

By the 1980s with a broad product offering, Toshiba was the first to introduce the inverter driven unit [1981] and the twin rotary compressor [1988].

In 1990, Toshiba again led the industry with the launch of its product range operating with non-ozone depleting refrigerants [R-410a].

Toshiba's spirit of innovation continues with its relentless drive for product and system improvements.

# EXPERIENCE THE FUTURE

The expectations of a modern air conditioning system have evolved over the past years. Today, advanced comfort goes hand in hand with reduced energy and maintenance costs, combined with maximised simplicity and true operational flexibility. SMMS-u associates all of Toshiba's innovative spirit and outstanding expertise to create highly efficient solutions with maximum end user comfort at its core.

## Benefits for Consultants

### Customisation

SMMS-u offers unlimited possibilities with its wide range of indoor units, ensuring the client's requirements are fully addressed.

### Control

Fully integrated controls available, allowing unlimited access to the system and its operation.

### Flexibility

A high degree of system flexibility, aided by a fully flexible piping specification and an extremely compact outdoor design.

## Benefits for Users

### Comfort

Each indoor unit can be individually controlled, allowing you to condition only those rooms that need heating or cooling.

### Efficiency

Low operating costs thanks to high levels of efficiency via optimal load adjustments.

### Reliability

Hassle-free operation based upon decades of experience and intensive testing for all systems.

## Benefits for Installers

### Simple

One supplier, one point of contact for a total solution.

### Versatile

Maximised installation flexibility.

### Convenient

Easy access for all service and maintenance needs.

### Professional

Intensive training and instructions offered by local TOSHIBA experts.

# A BRAND NEW CHASSIS

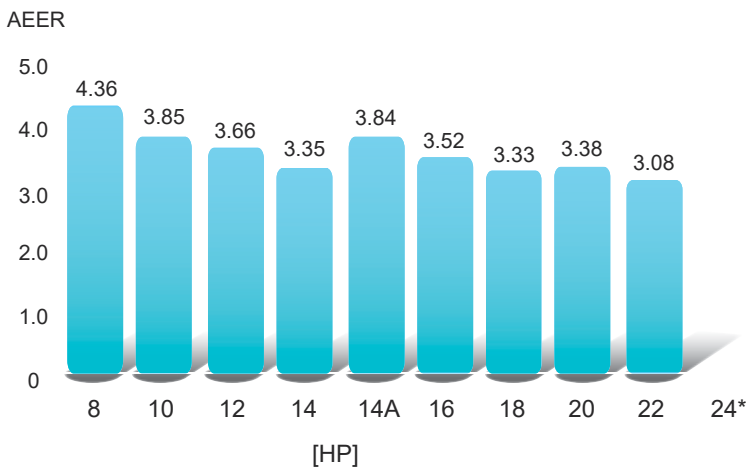

Discover a totally new redesigned chassis which is now the perfect mix between dimension, efficiency, capacity & sound level. Engineered in Japan, SMMS-u integrates all the latest technological innovations from Toshiba to achieve top class efficiency and ensures unrivalled comfort levels.

# TOP CLASS EFFICIENCY

Utilising the new highly efficient core technologies results in greater energy efficiency and performances.

AEER up to 4.36

ACOP up to 4.59

\*24HP: This product will be compiled with GEMS [MEPS] 2020 edition starting from April 2022

# FLEXIBLE CONNECTIVITY

SMMS-u oversteps all the limits of VRF for maximised project coverage. Whatever the piping length, the height difference, the number of indoors connected and operating - SMMS-u is always delivering the best.

3,000 combination patterns  
to achieve up to 120HP

1,200m max  
piping length

110m max  
piping lift

Heating, cooling, fresh air  
and hot water production

Up to 128 indoors  
unit connection possible

+52°C Cooling  
-25°C Heating

Up to 200% combination  
Diversity ratio

# FLEXIBLE FREE COMBINATION

Never be restricted with size, capacity or configuration, SMMS-u offers free combination with a total of 3,000 combination patterns being available to suit any site requirements.

## Standard (Space-Saving)

Capacity Cooling: 123.0kW  
Heating: 132.0kW  
Efficiency Cooling: 3.18  
Heating: 3.72  
Width: 2,600 mm

## Balance (Space-Saving)

Capacity Cooling: 123.0kW  
Heating: 132.0kW  
Efficiency Cooling: 3.38  
Heating: 4.04  
Width: 3,310 mm

## Increased Heating Capacity

Capacity Cooling: 123.0kW  
Heating: 138.0kW  
Efficiency Cooling: 3.19  
Heating: 3.41  
Width: 2,600 mm

## Balance (Moderate)

Capacity Cooling: 123.0kW  
Heating: 137.5kW  
Efficiency Cooling: 3.71  
Heating: 4.27  
Width: 3,610 mm

## Max. Highest Efficiency

Capacity Cooling: 123.1kW  
Heating: 137.5  
Efficiency Cooling: 4.40  
Heating: 4.74  
Width: 5,030 mm

## Balance Efficiency

Capacity Cooling: 123.0kW  
Heating: 138.0kW  
Efficiency Cooling: 3.93  
Heating: 4.48  
Width: 4,020 mm

# UNIQUE ON THE MARKET: TRIPLE ROTARY COMPRESSOR

The exclusive Toshiba Triple Rotary compressor brings outstanding performance to SMMS-u without compromising on system reliability.

## DLC Treatment

Toshiba's Diamond Like Carbon coating technology is unique to Toshiba VRF compressors.

It covers the wear surfaces on compression vanes for outstanding hardness and wear resistance, enhancing both the compressor's performance and durability.

## Triple Rotary Compressor

The advanced technology used within SMMS-u results in a robust and durable system. The innovations made with Toshiba triple rotary compressor delivers an even stronger and more reliable system.

Large capacity

Wide operating range

Low required refrigerant

Low vibration

DLC Treatment [Diamond Like Carbon]

# STRONG ADAPTABILITY

SMMS-u integrates new features to adapt operations to local constraints with a constant target: the alliance of comfort and energy savings.

**Split heat**  
exchanger

Heat Exchanger automatically varies depending on workload, maximising energy savings and system reliability.

**Autobackup**  
function

Automatic backup in case of combinations systems failure.

**Balance oil**  
circuit free

No oil balance pipe needed with the new lubrication technology.

**Rotation**  
drive

Smart control to automatically equalize compressor operating hours.

**Demand**  
control

Smart control to automatically equalize compressor operating hours.

# COMFORT ABOVE ALL

Providing end user high level of comfort is the SMMS-u priority. In addition to a wide range of indoor units adapted to any kind of room configuration, defrost logic has also evolved to increase continuous run time, shorten defrost cycles. Toshiba is offering one of the most accurate refrigerant flow management systems.

# INTELLIGENT DEFROST

SMMS-u can maximise heating capacity by improved new heating operation and defrost operation.

**Individual defrost:** continuous heating up to 5 hours.

## Kobestu

Newly developed modular defrosting system. This new control can be utilised in modular systems only.

This new control utilises the advantages of the Toshiba rotary compressor, by varying the compression ratio between the two compressors in each of the outdoors to create a two-stage defrosting control.

The benefits of this control can be split between decreasing the time the outdoor is in defrost and the ability to continue to supply refrigerant to the indoor units, allowing the fans to continue to run in heating operation, albeit at a reduced capacity output.

## Renkey

This new control has been designed to manage the defrosting pattern for outdoors that utilises individual refrigeration systems, but in a group setup via the new Uh protocol or via a BMS system.

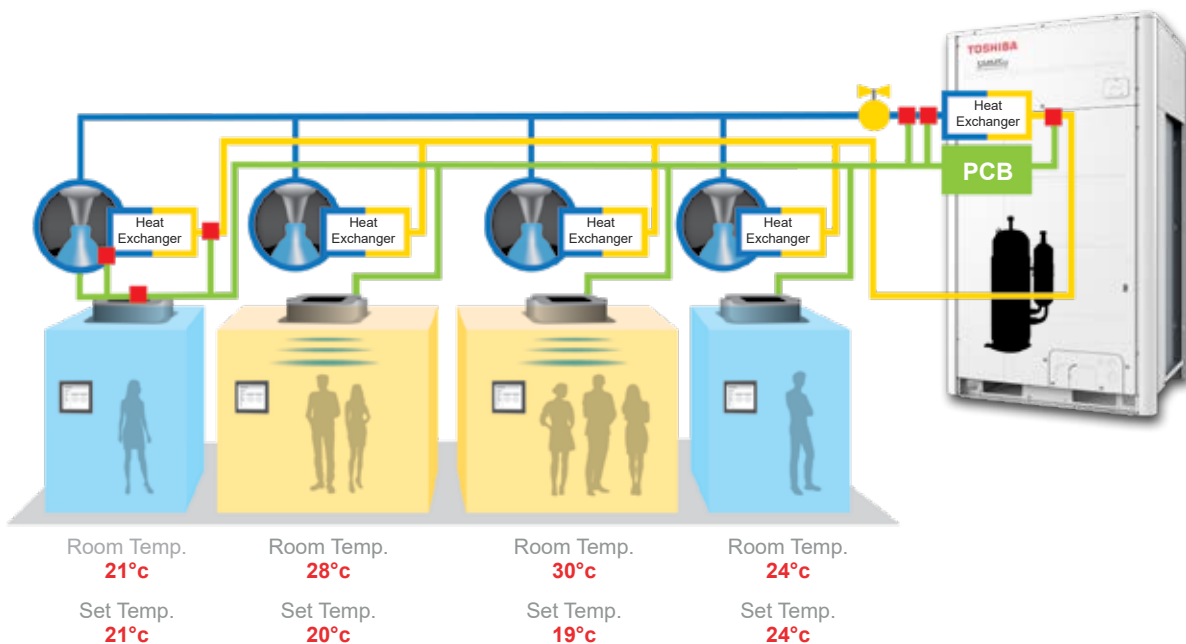

Utilising the new Uh protocol, the header unit is able to control all the other units to ensure the units will defrost separately, via time shift. This control ensures the building will receive a continuous heating supply, even when one system is in defrost.

# INTELLIGENT VRF CONTROL

Mixing 0.1Hz compressor speed control with high precision pulse motor valve, SMMS-u delivers the right quantity of refrigerant to all indoor units in demand.

The advanced intelligent VRF control continually adjusts the operation of both indoor and outdoor units, based on the feedback from multiple sensors.

# DESIGN ENHANCEMENTS

SMMS-u introduces an all-new refrigeration circuit design. This new design has been developed to take advantages of the multiple enhancements that have been made to the SMMS-u design.

## New Heat Exchanger

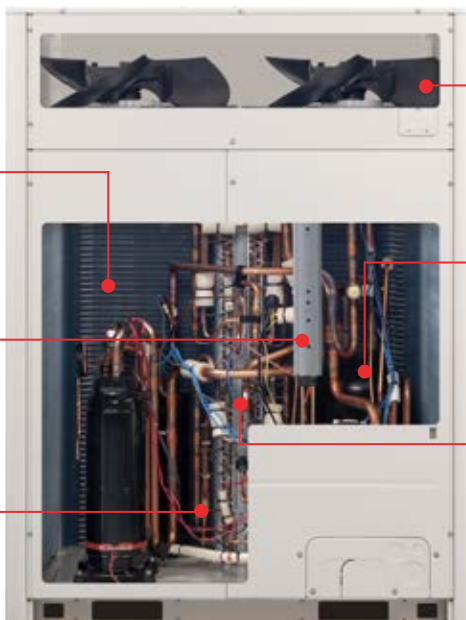

- Double design for 8HP to 14HP & 16HP
- Triple design for 16HP to 24HP

## New Inverter IPDU Cooling

- Direct feed from the condenser

## New Liquid Tank Removal

- New Refrigeration distribution control

## New Fan Propeller Design

- Maximise Air Flow
- Increased static pressure [80Pa]

## New Accumulator

- Reduction in pressure drop
- New Oil / Refrigerant pipe design

## New Oil Management Control

- New Oil circuit design
- New Oil level detection control
- New Oil dilution detection control
- New Smart oil flow control
- Oil balance line between outdoors removed

## WIDEST INDOOR UNIT RANGE

To compliment SMMS-u, Toshiba offers an array of indoor unit types, ensuring comfortable airflow in every space.

- 19 different indoor unit types
- 20 capacities from 0.3HP to 20HP

**2021  
NEW  
Indoor  
units**

**Smart Cassette**

High performance smart operation

**1-Way Cassette**

Compact chassis  
Smart operation  
Advanced filtration

**Fresh Air Intake Duct**

Light and compact chassis  
Wide air flow range

**High Wall**

Expanding capacity up to 4HP  
Big air flow volume  
Low noise

# CONTROLS AT YOUR FINGERTIPS

Toshiba offers a large choice of control solutions, all compatible with the NEW TU2C Link protocol. SMMS-u is also compatible with BACnet®, LonWorks® and Modbus® BMS languages.

WIRELESS REMOTE CONTROLLER KIT  
**RBC-AXU31-E**

Wireless remote controller with a standalone discreet receiver, making it easily accessible with added flexibility of placement.

**FUNCTIONS:**

- Easy to use controller
- Start / Stop
- Operational mode change
- Temperature setting
- Air flow changing
- Timer function
- Check code display

COMPACT WIRED CONTROLLER  
**RBC-ASCU11-E**

Back to basics with this remote controller offering all the standard functionalities with compact dimensions and a large screen.

**FUNCTIONS:**

- On / Off
- Operation mode
- Temperature setting
- Fan speed
- Louvres
- Fault codes
- Unit setup

STANDARD WIRED CONTROLLER  
**RBC-AMTU31-E**

The standard remote controller to control an individual indoor unit or a group of 8 indoor units.

**FUNCTIONS:**

- On / Off
- Operation mode
- Temperature setting
- Fan speed
- Louvres
- Fault codes
- Unit setup
- Button restrictions

BACKLIT WIRED CONTROLLER  
**RBC-AMSU51-ES**

The ultimate in local controller with built in 7-day timer, large screen and menu.

**FUNCTIONS:**

- On / Off
- Operation mode
- Dual set point
- Fan speed
- Louvres
- Return back
- Energy savings
- Frost protection
- Soft cooling
- Leak detection
- Fault codes

64 CENTRAL CONTROLLER  
**TCB-SC640U-E**

This standard central controller allows easy control and simple monitoring for up to 64 indoor units through its easy touch panel operation.

**FUNCTIONS:**

- Full control of up to of 64 units
- Individual indoor unit, group [up to 10 groups]
- Simple and intuitive interface with user friendly menus
- On / Off, operation mode, temperature, fan speed
- Large backlit display
- Touch-sensitive keys
- Embedded digital outputs

## ADVANCED CONTROLS

A range of intuitive central controllers are available where air conditioners are required to be monitored or controlled from a central or remote location.

128 SMART MANAGER

**BMS-SM1281ETLE**

This Smart Manager has the ability to control from a local area network with dedicated interface accessible from every web browser.

**FUNCTIONS:**

- On / Off
- Temperature setting
- Error display
- Schedule timer
- Web connection
- Energy monitoring
- Error information transfer function by E-mail

256 TOUCH SCREEN CONTROLLER

**BMS-CT2560U-E**

This controller is ideally suited to any small or large installation where energy monitoring functions are required.

**FUNCTIONS:**

- Full control of maximum 256 units
- 7" Colour touch screen
- Intuitive navigation
- Advanced scheduling of indoor and outdoor units
- Energy monitoring with or without power meter
- Embedded input and output
- Dedicated fault code menu with email transfer capability

512 TOUCH SCREEN CONTROLLER

**BMS-CT5121E**

Ideal controller to suit commercial applications such as offices, hospitals, retirement villages, hotels etc. where energy monitoring functions are required.

**FUNCTIONS:**

- Full control of max 512 indoor units
- 12.1" Large coloured touch screen
- Quick and accurate view of indoor unit's status
- Floor, building, tenant and system overview
- Built-in web browser
- Weekly timer [up to 20 programs per day]
- Energy monitoring with graph - view operating hours, set point, inside/outside temperature and power consumption
- E-mail alert

SMART DEVICE CONTROL [WIFI]

**BMS-IWF0320E**

A versatile interface for Toshiba light commercial and VRF air conditioning units that enables WiFi connection.

**FUNCTIONS:**

- Remote access via app on a smart device
- On / Off
- Temperature setting
- Fan speed
- Timer function
- Schedule function
- Energy save function
- Permit / Prohibit function
- Error display
- Room temperature monitoring

# COMMISSIONING AND MAINTENANCE

Save time during commissioning and maintenance. Choose between the “Wave Tool Advance” using Smartphone NFC connection or the link adaptor connected to the outdoor or indoor unit.

Wireless connection using smartphone\* NFC technology to collect system data

\* Please contact Toshiba for Android\* phone compatibility list.

Get access to system data from indoor using link adaptor

Direct USB connection to get access to system data

System operation self record using link adaptor

## Wave Tool Advance (WTA)

With the introduction of SMMS-u, there has been fundamental changes made to the diagnostic controls, allowing engineers to record, diagnose and interrogate the system.

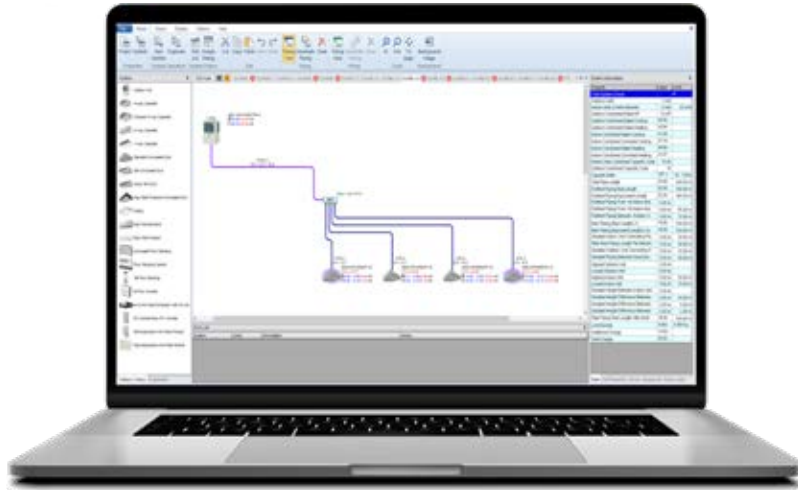

In keeping with the previous generation, the SMMS-u comes with a new version of wave tool - **Wave Tool Advanced**. The enhancement sees the increase in functionality of the NFC Android App, allowing additional information to be collected and analysed on-site or in the office.

## New Link Adaptor

The new link adaptor comes with an 8GB microSD card fitted, allowing service personnel to make long term refrigeration cycle recordings of the system (up to 1 month), making it ideal for installations where intermittent issues have been reported.

# TOSHIBA SELECTION TOOL

Designed for novice and expert users, Toshiba selection software creates simple, yet detailed VRF system schematics. It is highly versatile, allowing the level of detail to be tailored to suit customer requirements.

# JOINTS AND ACCESSORIES

Name	Model Name	Capacity	Remarks	
Branching joints and headers	Y-shape branching joint	RBM-BY55E	under 6.4hp	
		RBM-BY105E	from 6.4 to 14.2hp	
		RBM-BY205E	from 14.2 to 25.2hp	
		RBM-BY305E	from 25.2 to 61.2hp	
		RBM-BY405E	61.2hp or more	
	4-branching header	RBM-HY1043E	under 14.2hp	
		RBM-HY2043E	from 14.2 to 25.2hp	
	8-branching header	RBM-HY1083E	under 14.2hp	
		RBM-HY2083E	from 14.2 to 25.2hp
